

Great Deception of satan

As I can see that there are many many Muslims and faithful people who gets trapped by the satan into the realm of atheism if it was not the grace of MY LORD i would have got stuck in their too, what I have learnt from my experience i wanna share it with you all so if there is someone who is looking for a light so maybe IF ALLAH WILLS maybe this would help someone.

The greatest question of humanity why we exist? Why this world exist? Is this made on it own or by Someone Supreme in Might?

This question is the first and foremost and the backbone of all questions. This question leads to all the answers of every possible problem of this world and hereafter.

There are two possible answers by 2 catagories of people there is no other catagory

(1) Believers and (2) non Believers

Believers

This catagory beleive in a SUPREME POWER WHO made everything. Either it can be of any religion.

(2) Non Believers

This catagory has no clue about anything they think everything is made own it's own.

We will address the question of GOD by the non believers point of view as believers already believe.

Their point of view

Everything is made on it's own, ok how can this be possible.

This unvierse works on cause and effect rule our intellectual capability in which it is wired by THE SUPREME POWER that everything around us is made by a maker for everything to be in existence there has to be a source first.

And for everything to exist as how precise it is an ULTIMATE INTELLIGENT SOURCE has to exist otherwise existence can have no existence.

For example

Dominos rule

Everything exists because of dependency of other prior source.

Like if you have a pencil in your hand it must have been made into a factory and factory must have brought woods and woods must have come from trees and trees must have come from the ground and Sun and water. The sun came from big bang and big bang happened cause of forces of nature and forces of nature why do they exist there is not answer so there is a full stop so even if one day you get an answer of their existence then you have to find the reason of the founded reason so the chain goes on forever and ever until you do believe in ONE SINGLE ULTIMATE SOURCE, So for the pencil to exist there is chain of reasons and materials if there is a break in one piece then pencil would not exist.

Similarly if you deny ULTIMATE SOURCE then

If you go and go to the source of existence then there would be a never ending chain if you don't believe in ONE ULTIMATE SOURCE. Because the first DOMINO has to exist without a cause for the chain to start if there is no ending of chain then reality cannot exist.

This is logical answer now scientifically we will prove our point.

1. Question: If gravity was there in the first place to create everything, then we don't need a blueprint of GOD to create everything. Very modern argument by followers of Stephen Hawkings.

Answer:

who created gravity? in the first place, Gravity is not an independent creator but a tool used by Allah (SWT). Just as soil existed before humans were created, just like light existed before the creation of Angels just like fire existed before the creation of Jinns so this is the ultimate intelligence of ALLAH if ALLAH had created human beings first and no air to breathe how could they survive if he created the humans first then food what could they eat if ground was made later how could anyone ever walk on it so survival is not possible without the pre-existence of the needs of the creation to attain sustainability, gravity was present as a means for Allah's creation.

Modified Explanation:

Gravity's existence doesn't contradict faith but rather affirms it. Allah (SWT) created the laws of physics, including gravity, as instruments for His divine plan. The Qur'an reminds us:

"And We have placed within the earth firmly set mountains, lest it should shift with them, and We made therein [pathways] as roads that they might be guided." (Surah Al-Anbiya 21:31).

Just as mountains stabilize the earth, gravity stabilizes creation. Gravity being there first only highlights Allah's pre-planned system of creation.

2. Question: Does quantum fluctuation prove creation without God?

Answer:

Quantum fluctuations, which result in the creation of matter and antimatter, actually align with the Qur'an. Allah says:

"And of everything, We created two mates; perhaps you will remember." (Surah Adh-Dhariyat 51:49).

Quantum fluctuation's "pair creation" of matter and antimatter mirrors this verse. Just as gravity existed as part of Allah's creation process, the quantum vacuum existed before these fluctuations. It's another tool of Allah.

Modified Explanation:

Quantum fluctuations don't disprove God—they reaffirm the Qur'an's claim about the pairing of creation. Moreover, the existence of a "quantum vacuum" before fluctuations shows a designed precondition. Science uncovers the mechanics; faith explains the origin.

3. Question: Does the zero model of the universe negate the need for a Creator?

Answer:

The zero model suggests that the universe's total energy equals zero, balancing matter and gravity. This doesn't deny God but rather shows the precision of His creation. Just as gravity was present as part of creation's process, so too were the laws governing the zero model.

Modified Explanation:

The zero model highlights the balance of creation, a concept rooted in Qur'anic teachings:

"Indeed, all things We created with predestination." (Surah Al-Qamar 54:49).

The model's existence doesn't negate Allah (SWT); it reflects His wisdom in designing a balanced universe. **Same like first question Gravity and all other forces existed prior for this model to work. The science can never tell the reason for their existence in the first place.**

4. Question: If the universe functions through natural forces, why do we need to believe in God?

Answer:

Imam Ali (SAAW) addressed this beautifully:

He (as)said: "Just ask them "Does the nature that functions in such a well-planned and well-ordered fashion possess knowledge and power or is it devoid of intelligence and reason, without power and without knowledge?" If they admit that it possesses knowledge and power, then what stops them from having a belief in the Creator? We say "All things are created by One Who is Master of Knowledge and Power". They say that there is no Creator but they admit that nature had done this with ingenuity and plan. As such nature is the cause of their creation, while they deny the Creator. If they say that nature produces such things without knowledge (not knowing what it is doing) and without having the power to do it, but also is flawless in its design and built upon logic and reason, then this type of thinking is illogical and unacceptable. It is obvious that the outcome comes from an All Knowing Creator who has created a process and laid it down amongst the creation and it is that process that they call as "nature" when in reality it is the plan of an All Knowing Creator. In other words, Almighty Allah has ordained a method to produce everything according to its definite cause and principle.

Modified Explanation:

The argument boils down to causality and intelligence. Either we attribute intelligence to the forces of nature—which logically points to a higher Intelligent Creator—or we recognize that non-intelligent forces cannot produce the finely-tuned universe we observe. Both paths lead to Allah (SWT).

5. Question: How can the sun burn for millions of years when the Day of Judgment is near?

Answer:

The sun's natural lifespan doesn't conflict with the Qur'anic concept of the Day of Judgment. Miracles like the splitting of the moon or the parting of the sea during Prophet Musa's (AS) time show that Allah (SWT) is not bound by natural laws. The sun's burning can cease

instantly at His command when the Day arrives. Yeah like moon's nature was never made to be split but on miracle demand it was the sea naturally is never to be split in half but at the time of MOSES(A.S) it was.

Modified Explanation:

The Qur'an teaches:

"The Hour will come suddenly." (Surah Al-Ankabut 29:53).

Just as Allah (SWT) split the moon (Surah Al-Qamar 54:1), He can bring an end to the sun's burning whenever He wills. Natural laws are subordinate to His power.

The atheist often accuse about the CREATOR by saying where did ALLAH bring the material out of no where from which shop?

I wanna ask how did gravity and other forces of nature proven by today scientists bring these materials from which shop?

From which shop the gravity is brought and other forces of nature?

Indeed my LORD SAYS HE IS KHALIQ

KHALIQ means To create something from prior existing source

Forces of nature being their before hand aligns with the concept of KHALIQ as these forces of nature existed before hand so ofcourse these are MY LORD'S TOOL

There is also an arabic term as Ijaad means to bring something into existence without any prior source. MY LORD CREATED THESE FORCES WITHOUT ANY PRIOR SOURCE.

Here is the link to the ultimate guide by GOD every believer and non believer should read it.

<http://islamicblessings.com/upload/TawheedAlMuffadhal.pdf>

Now cure for the muslims who have doubts

As my LORD showed me the light. I wanna say understand the trick of satan first when you have doubts but you believed first then first believe it that it is not you.

First cure is this

Second cure

Prayer and patience and ignoring this doubt would help you.

Third cure

Remember what Quran says think don't put a full stop because you are having doubts as Quran says see my signs in the creation of heaven and earth what i was suffering the satan said if you think you will doubt God but i didn't think he tricked that science might have better answers of existence of universe but as i jumped into science's heart i found the very quote by an intelligent person. "First surface of glass of science can make you anthiest but below the glass GOD is waiting for you"

So never doubt that science is something different or it paints a different picture ofcourse not it really makes you see the ultimate design of the LORD.

This is a very cunning trick of satan you know first he will make sure you shut your brain by waswasas saying if you think about science you are already doubting on GOD how can you ever think about science when you have faith and then if you don't think about science then he will say how can science be untrue how can it not has the answer for the creation of universe without a creator. As so many intelligent people(animals) say so There is the loop you have to catch see how making you see science is something else and religion is something when Einstein said "Science without religion is lame, religion without science is blind."

Ultimate 4th cure

Fear this is his tool as well, depression and hopelessness in GOD and in your ownself is the biggest weapon of satan once you become hopeless he won't go. God said if you have lose Hope in the MERCY OF ALLAH this is the work of disblievers so if you are gone in that stage satan has already half succeeded. If you lost hope you are stuck then. If you wanna get out then see the last cure for having Hope again.

- my sons! Go and search [diligently] for Joseph and his brother. And do not lose hope in the mercy of Allah, for no one loses hope in Allah's mercy except those with no faith."**

Can you not see now the problem is being despair this is the veil of satan which he will put on your faith only if you can pull it off by prayer and beleif you will be alright.

Remember what the Quran says:

Say, **“O Prophet, that Allah says, “O My servants who have exceeded the limits against their souls! Do not lose hope in Allah’s mercy, for Allah certainly forgives all sins.¹ He is indeed the All-Forgiving, Most Merciful.**

1. **“God does not burden any soul with more than it can bear.”**
[Quran 2:286]

2. **“Do not lose heart or despair- if you are true believers you have the upper hand-”** [Quran 3:139].

3. **“So truly where there is hardship there is also ease;”** [Quran 94:5].

4. **“My mercy encompasses all things”** [Quran 7:156]

5. **“And will provide for them from an unexpected source; God will be enough for those who put their trust in Him. God achieves His purpose; God has set a due measure for everything.”** [Quran 65:3]

Remember this doubts are your test not your disbelieve

Do you think you will be admitted into Paradise without being tested like those before you? They were afflicted with suffering and adversity and were so **“violently”** shaken that **“even”** the Messenger and the believers with him cried out, **“When will Allah’s help come?”** Indeed, Allah’s help is **“always”** near. [Quran 2:214]

The last **ULTIMATE CURE**

The Hadith (Simplified Translation):

The Prophet Muhammad (ﷺ) said:

*“I leave among you two weighty things (**Thaqalayn**):*

*The first is the **Book of Allah (the Quran)**, in which there is guidance and light, so hold fast to it.*

*And the second is my **Ahlul Bayt** (my family). I remind you of Allah concerning my family, I remind you of Allah concerning my family, I remind you of Allah concerning my family.”*

Key Sources of the Hadith:

This hadith has been narrated in various authentic collections, including:

1. **Sahih Muslim** (Hadith 2408)
2. **Jami' al-Tirmidhi** (Hadith 3788)
3. **Musnad Ahmad ibn Hanbal**
4. **Sunan al-Darimi**
5. **Sunan al-Nasa'i al-Kubra**

This is the rope of GOD which will lead you to Law of Attraction ofcourse it is true what is this law if you HOLD the ROPE(SAAW) of ALLAH you will get it.

This is Law given by the QURAN itself.

The verse you're referring to is from **Surah An-Najm (53:39):**

"And that there is nothing for man except what he strives for."

1. What You Intend, You Receive

Surah Al-Zalzalah (99:7-8):

"So whoever does an atom's weight of good will see it, and whoever does an atom's weight of evil will see it."

This verse shows that every action, whether good or bad, has consequences. Your intentions and deeds shape what you will "attract" in the Hereafter.

2. Positive Thinking and Gratitude Bring Blessings

- **Surah Ibrahim (14:7):**

"If you are grateful, I will certainly give you more; but if you are ungrateful, My punishment is severe."

This verse highlights the importance of gratitude, a key principle in the Law of Attraction. By being thankful, you attract more blessings into your life.

3. Trust in Allah and Expect Good

- **Surah Al-Baqarah (2:186):**

"When My servants ask you about Me, I am near. I respond to the caller when he calls upon Me. So let them respond to Me and believe in Me, that they may be guided."

This verse emphasizes having a strong belief in Allah's mercy and expecting a positive response. Your trust and faith "attract" Allah's help and guidance.

The concept of the **Law of Attraction**—the idea that positive or negative thoughts bring positive or negative experiences into a person's life—has roots in psychology, spirituality, and self-help literature. While the Quran does not directly use the term "Law of Attraction," its teachings and verses align with the idea that thoughts, intentions, and actions lead to corresponding results.

Here are some examples of how the **Quran** reflects principles similar to the Law of Attraction:

1. What You Intend, You Receive

- **Surah Al-Zalzalah (99:7-8):**

"So whoever does an atom's weight of good will see it, and whoever does an atom's weight of evil will see it."

This verse shows that every action, whether good or bad, has consequences. Your intentions and deeds shape what you will "attract" in the Hereafter.

2. Positive Thinking and Gratitude Bring Blessings

- **Surah Ibrahim (14:7):**

"If you are grateful, I will certainly give you more; but if you are ungrateful, My punishment is severe."

This verse highlights the importance of gratitude, a key principle in the Law of Attraction. By being thankful, you attract more blessings into your life.

3. Trust in Allah and Expect Good

- **Surah Al-Baqarah (2:186):**

"When My servants ask you about Me, I am near. I respond to the caller when he calls upon Me. So let them respond to Me and believe in Me, that they may be guided."

This verse emphasizes having a strong belief in Allah's mercy and expecting a positive response. Your trust and faith "attract" Allah's help and guidance.

4. Allah Fulfills Your Expectations

- **Hadith Qudsi:**

"I am as My servant thinks of Me."

This profound hadith reflects the idea that Allah's response to a person aligns with their belief and expectations. Thinking positively about Allah results in attracting His mercy and blessings.

5. Actions and Mindset Shape Destiny

- **Surah Ar-Ra'd (13:11):**

"Indeed, Allah will not change the condition of a people until they change what is in themselves."

This verse highlights that change begins within oneself. Your mindset, thoughts, and actions create the reality you experience.

6. The Power of Dua and Intention

- **Surah Ghafir (40:60):**

"Call upon Me; I will respond to you."

The Quran encourages believers to ask Allah for what they want. This reflects the importance of setting clear intentions (a principle of the Law of Attraction) and trusting that they will manifest.

My friends, the simple truth is this: as the Hadith says, if you pray and truly believe that your prayer will be answered, it *will* be given to you. This is the real meaning of the law of attraction when asking from Allah.

Think about it—Allah has shown us His signs and sent 124,000 prophets (SAAW) to guide us. How can so many witnesses lie? How can it not be true

that every book has a writer, and that writer says, "I exist"? Allah has shown us the signs of His existence.

So, just accept this reality and have faith. Say to yourself: *I will be given; surely, I am going to be given. He knows my situation. How can He reject me because of my poor condition?*

If you can have faith in your mother, believing that she will always do good for you, then why not have even greater faith in Allah, the One who created you?

THIS IS THE BEST WAY TO GET CURED VERILY VERILY HAVE FAITH
YOU BE GIVEN FOR SURE ALLAH WILL NEVER LET YOU DOWN. YOU
ARE HIS CREATION.

IF YOU PULL OF THE VEIL OF HOPELESSNESS AND THEN HAVE SURE
FAITH YOUR PRAYERS ARE GONNA ANSWERED YOU WILL BE SHOWN
GUIDANCE

INSHA-ALLAH HOPE FOR THE BEST.
